

Kharkiv National Automobile- and Highway University -

the oldest University in Ukraine, which prepares highly-qualified specialists who are always in great demand in all countries of the world to work in the field of motor transport and road construction.

Currently, the University has eight faculties, namely: Automobile, Road Construction, Mechanical, Business and Management, Transportation Systems, Foreign Citizens Training, Distance Learning, Advanced Training and Retraining, where 10 000 full-time and external students, including about 1 000 foreigners from more than 30 countries of the world are trained.

The University employs over 500 highly-qualified experienced professors and scientists, including Honoured Workers of Science and Technology of Ukraine, Laureates of the State Prize of Ukraine, Academicians and Members of Transport, of the Academy of Ukraine, Doctors and doctoral candidates of Engineering Sciences, Professors and Associate Professors.

In 2001 according to the Decree of the President of Ukraine the University was awarded the status of “NATIONAL” for the high achievements in scientific and pedagogical activities.

At present, the educational activities of the University include:

- Bachelor’s degree programme (21 specialities);
- Master’s degree programme (17 specialities);
- Preparatory programme of postgraduate and doctoral students (10 scientific fields).

All specialities of the University are accredited by the Ministry of Education and Science of Ukraine. They are always **relevant** and in high demand at the labour markets of all countries around the world.

- KhNAHU was founded in 1930 and it is famous for its scientific schools, outstanding scientists, highly-qualified teaching staff and educational traditions.

- The University operates under state ownership and it has the highest level of accreditation in the system of the Ministry of Education and Science of Ukraine.
- Diplomas of the University are recognized in more than 100 countries worldwide.
- KhNAHU has a high international rating, it participates in international projects and programmes. Within the framework of the signed bilateral agreements, the University cooperates with 65 foreign partners in the field of education and scientific research.
- Scientists, teachers and students of KhNAHU have been constantly participating in European and international programmes such as TEMPUS, ERASMUS, FULBRIGHT, DAAD, „Internship Programme of German Business for Ukraine“ as well as attending foreign universities to study, conduct joint researches, give lectures, undertake internships and advanced training. ERASMUS +, since 2016, is being implemented with the participation of scientists and specialists of the transport industry of Dresden Technical University together with the Department of Transport Systems and Logistics of KhNAHU. For 3 years already, at the department of transport systems and logistics the summer school of transport mobility is running, which is attended by students of all Ukrainian universities of the relevant specialty.

Another European project ERASMUS + is carried out by students, teachers and specialists of mechanical faculties of two universities: KHNADU and Łódź Polytechnic from Poland. Training of Ukrainian students in Lodz, student internships, participation in double diploma programs, internships for Ukrainian teachers and scientists in Polish universities, and research work is running well.

ERASMUS + has also been signed with Brandenburg University of Technology from 2019 to 2022 (previously signed in 2016 and in force until 2018).

- The University has developed specially adapted methodological materials for foreign students (lecture notes, methodological recommendations for making the individual tasks, course and diploma projects) that contribute to increasing the efficiency of their independent work as well as the quality of their professional training.
- The University is a strategic partner of the American company Autodesk through the regular participation and victories of KhNAHU's student team in international competitions on computer simulation that are held by the company.
- The German-Ukrainian Centre has been established and is now functioning successfully in the University. Ukrainian and foreign students study the German and English languages and get acquainted with the culture, history and traditions of Germany there. In addition, consultations, training and master classes for students are constantly held at the center, after which they can travel abroad and participate in international programmes and projects, internships, competitions, conferences in Germany and other European countries.

Special attention is paid to computer training of foreign students, which is conducted in 60 computer classes of the University. The special-purpose educational portal has been created and all methodical and scientific materials on disciplines of studies are stored in *electronic* form there. Modern software products (AutoCAD, Mathlab, INVENTOR, VISSUM, etc.) are widely used in engineering calculations

- The student body of KhNAHU, including foreign citizens can take part in double diploma programmes with leading European (Polish) universities.
- University teaching staff trains foreign students in a good atmosphere of professionalism, understanding, exactitude and objectivity in knowledge evaluation, and the teachers help students to study difficult material, conduct extra-classes and consultations.
- While studying at the University, foreign students are actively involved in scientific research work, participate in students' scientific conferences, competitions, scientific competitions, and write scientific articles. According to their achievements, students are awarded with certificates and diplomas.
- In the course of their studies, foreign students can carry out real course and diploma projects using the source data of their native countries for the calculations.
- The University has the best preparatory faculty for the language training of foreign citizens. Modern educational, multimedia and interactive technologies as well as original computer training and monitoring programs have been developed and are widely used here.
- The Laboratory of Racing Cars that has been operating at the University for more than 50 years is used by students for practical applications of theoretical knowledge obtained in classrooms and creating unique models of record-breaking cars by their own hands as well as taking part in national and international sports competitions (2010-2016 SCHELL Eco-marathon, Formula E8, etc.).
- The University provides foreign students with a lot of interesting leisure-time activities. They are actively involved in [amateur talent contests](#), sports competitions and other cultural events.
- The University's academic buildings and students dormitories are located in the centre of the city.
